DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of the tool system or improvement for a mop in the reply filed on 02 October 2006 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Sayles et al (US patent 6,295,688).

The patent to Sayles discloses an insertion tool, at least as far as defined. Sayles discloses a plastic, elongated, cylindrical member (12) having a handle (14) at one end with a tether thereon (see fig.1). The other end of the cylindrical member is adapted for pressing a portion of a cleaning wipe, at least as far as defined. A clip portion (10) is provided for selectively receiving the elongated member when it is not in use.

With respect to claims 1 and 7, defining that the tool is “for use with a conventional electrostatic mop” or is an improvement to a mop does not act to distinguish from Sayles. The device of Sayles could be used in any manner so desired. It could be used with a mop or as an improvement to a mop. Nothing would prohibit such. It is noted that applicant is only claiming the tool, not the combination of tool with mop.

With respect to claims 3, 4, 6, 9, 10 and 12, the clip portion of Sayles is “couplable” to any structure so desired. Nothing would prohibit such. Likewise, the tether is “couplable” to any structure so desired. Nothing would prohibit such.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant's attention is directed to the patent to Gregg which shows a tool (12) with tether (28) and clip (14) for receiving said tool.
